March 3, 2017

Dear Parents/Guardians,

As you are probably aware, there has been a raccoon with Rabies found in the Kendall area. Although Kendale Elementary School is not directly located in the zone, it is located in the outskirts of the zone. Therefore, we want to make sure we are taking every precaution by being proactive in notifying our parents and community of the health issue.

As we head into the weekend and students are involved in other activities outside of school, please remind them about safety measures regarding stray or wild animals. At Kendale Elementary we have already taken measures by informing our staff and students as well as being watchful of any potential dangers.

On the reverse side of this letter you will find an informational flyer provided to us by the Florida Department of Health in Miami-Dade. It contains all the information you need to know. Please take a moment to share pertinent information with your children and families. At Kendale Elementary, our first and foremost priority is always to keep our students, families, and community safe. We appreciate your support in this matter.

Should you have any other questions related to Rabies, or if you observe any animals in question, please contact the Florida Department of Health in Miami-Dade County at 305-470-5660.

Sincerely,

Mary Ann Alonso, Principal
Kendale Elementary
